

NO RESIDUE VOID LABEL

PROTECTION – CONTROL – IDENTIFICATION - TRACKING

"NO RESIDUE LABEL SEAL"

Thanks to the innovative material, our labels *"NO RESIDUE LABEL SEAL"* can be used on any dry surfaces. In the event that the label is removed, a tampering writing will appear on it and at the same time it won't leave any sticky residue on the applied surface.

PROTECTION – CONTROL - IDENTIFICATION – TRACKING

It is particularly suitable for all those situations where the removal of the old residues is required before using a new security label.

Once the "*NO RESIDUE LABEL SEAL*" is removed, it automatically shows the "VOID" message which cannot be hidden in any way and it reveals the act of TAMPERING.

Our labels "*NO RESIDUE LABEL SEAL*" are particularly recommended for security checks in the aviation sector.

The picture shows how the void label is irremediably tampered, even if it is positioned once again.

The VOID writings are visible on the surface of the label that is raised.

It is noticeable that the void label is an efficient security labelling system in order to prevent any attempts to tamper.

Void labels are adhesive security labels and they are also applied on products under warranty, goods in rental, in assistance or undergoing repair, in order to point out attempts to open products, hardware, goods or packaging by unauthorised people. Void security labels are also an efficient way to control and monitor the originality of the product along its entire route from its production until the purchase by the final customer.
